## **International Screening Solutions Partners with ClearStar to Better Deliver International Screening Technology and Services**

**Kennesaw, GA – March 10, 2011** – International Screening Solutions, Inc. (ISS), the leading wholesaler of international background screening products for over 201 countries globally, announced a strategic technology and services partnership with ClearStar, Inc., a leading background screening industry technology platform provider.

With ISS input, ClearStar developed International Profile Control, an international version of the ClearStar Aurora technology platform. Using ClearStar’s Gateway Web Services, ISS created its unique customer interface *iPartner*, including the ISS *iQuote*, *iResearch*, *iScreen* and *iForms* features. *iPartner* provides ISS customers a customized solution for entering searches, tracking candidates, receiving results and meeting global compliance requirements.

“In choosing a new technology partner, the fundamental strength of the ClearStar Aurora technology platform coupled with our ability to create customizable customer experiences and build our own platform integrations was decisive,” explained ISS Chief Technology Officer Eric Beach. “This partnership will also dramatically improve our operating efficiencies and provide the tools necessary to drive and support growth.”

In addition, ISS is now an integrated external supplier on the ClearStar Supplier Network. ISS services can be delivered seamlessly to any background screening company utilizing ClearStar’s Aurora technology platform, or delivered via Web services integration between ISS and a background screening company utilizing any other technology platform.

“The ISS and ClearStar operations and development teams have created a strategic partnership that not only benefits ISS and its customers, but also further strengthens ClearStar’s already robust integrated Supplier Network,” stated Shawn Hubert, ClearStar Vice President and Chief Operating Officer.
