

For Immediate Release

ClearStar.net Launches Aurora Platform

CUMMING (ATLANTA), GA – April 11, 2008 – ClearStar.net, a leading information provider for the employment and tenant screening industry, announced today the launch of the Aurora platform, the new technology supporting all ClearStar.net Screening Management Solutions™.

“Aurora provides ClearStar.net with a significant technology update and a new solid foundation that will enable us to aggressively drive new opportunities and initiatives,” explained R.J. Vale, CEO of ClearStar.net. “The new platform is a direct result of our long term collaboration with trusted partners and our valued business owners.”

Release of the Aurora Platform brings several major improvements to ClearStar.net business owners to include:

- Improved security, to include secure profile delivery
- Easy upgrade path that utilizes themes that manage the customer experience
- Streamlined administration of services and account management
- Increased flexibilities and efficiencies in order management and fulfillment

“Business is at my finger tips with the new order handling and filters. The enhancements in the customer administration section make configuring even the most complicated customer service requirements easy,” continued early adopter Will Barada, Vice President of Barada Associates, Inc. “ClearStar.net is truly changing the way I do business.”

Enhancements to presentation and usability work together to further increase productivity.

“With Aurora, I can manage my entire workflow from the home page,” stated Steve Durie, President/CEO of SecureSearch. “Improved order processing and faster fulfillment of customer service requests have set new standards for the efficiency that my

customers have come to expect from our organization. We are very excited about the new direction of the Aurora platform.”

Aurora is built with Microsoft’s recently released Visual Studio 2008 and runs on .NET Framework 3.5. The Visual Studio 2008 release includes significant additions of more than 250 features for developers and next generation Web 2.0 functionality including ASP.NET AJAX.

“We felt it was important for us to embrace Microsoft’s latest development tools release in order for us to provide continual advancements and maintain our competitive advantage,” continued Vale. “As ClearStar.net was the first service provider to deploy a 100% internet based solution, it’s only fitting for us to adopt new technology quickly to continue to meet market demands.”

About ClearStar.net

ClearStar.net is a trusted provider of strategic services and decision making information for background screening firms. ClearStar.net’s proven technology infrastructure is HR-XML Consortium certified and sets the foundation for a strong community of progressive, independent retailers who provide risk mitigation, employment and tenant screening services.
