

## **ClearStar's Titer and Drug Screening Solution to be Integrated into IntelliCentrics' SEC<sup>3</sup>URE Program for Hospitals and Healthcare Organisations**

*ClearStar's automated order placement, registration, automatic transmission, to eliminate the traditional paper-intensive forms and inefficient way of collating data for titer and drug screening tests*

ClearStar (AIM: CLSU and CLST), the technology and service provider to the background check industry, is pleased to announce that it has entered into a partnership with IntelliCentrics, the healthcare industry leader with over 10,000 distinct installations of vendor credentialing across the USA, Canada, and the United Kingdom.

Under the terms of the partnership, ClearStar's automated titer and drug screening solution will be integrated into IntelliCentrics' SEC<sup>3</sup>URE Program for Hospitals and Healthcare Organisations. The SEC<sup>3</sup>URE healthcare experience is designed to allow hospitals to control access by healthcare industry representatives (HIR), by ensuring only those that comply with the hospital's specific policies gain access to patient sensitive or restricted areas.

Individual hospitals decide entry requirements, which can include relevant immunisations, professional accreditations and compliance with hospital policies. A titer test measures the existence and levels of antibodies in the blood i.e. the ability to provoke a response from the immune system to disease. This response can come from natural exposure or from vaccination. Rather than hospital staff having to conduct the checks, HIRs pre-register via the SEC<sup>3</sup>URE system, which confirms their compliance status when they arrive on site.

With this partnership, IntelliCentrics has the tools for its members to streamline the titer and drug testing ordering and results, saving time and money. With automated order placement, registration, automatic transmission, it will eliminate the traditional paper-intensive titer and drug test forms, double data-entry, and multiple logins to the test ordering websites.

"Members of the IntelliCentrics community rely on us to deliver and provide the most efficient service and technology to do their jobs at peak levels while concurrently safeguarding a SEC<sup>3</sup>URE healthcare experience for everyone. Our affiliation with ClearStar advances our capability to protect our entire community," **comments Mike Sheehan, Global CEO of IntelliCentrics**. Sheehan continues "The partnership between IntelliCentrics and ClearStar is at the core of our belief that we all play a role in a safe and SEC<sup>3</sup>URE healthcare experience."

"We are very proud to be working with IntelliCentrics with whom we share a common goal of assuring safety for the healthcare providers and patients through this new best-of-breed solution," **stated Robert Vale, CEO of ClearStar**. "By integrating our mobile, paperless chain of custody technology with IntelliCentrics' industry-leading service technology infrastructure, we will enable healthcare personnel to be screened and approved for work more quickly thereby meeting the aggressive time demands on the healthcare industry."
