**ClearStar drives accelerated growth in Medical Information Services**  
***Milestone achieved with over \$1 million monthly sales in July***  
**Notice of Interim Results**

ClearStar (AIM: CLSU), a provider of Human Capital Integrity<sup>SM</sup> technology-based services specialising in background and medical screening, is pleased to announce that it has achieved a key milestone in its Medical Information Services ("MIS") with monthly sales exceeding \$1 million for the first time as the Company accelerates growth in this business area.

MIS sales in July 2019 of \$1.06 million represents 37% growth over July 2018, and accounted for 47% of total revenues in the month (July 2018: 45%). For the year to 31 July 2019, MIS revenue was 27% ahead of the same period in 2018.

This growth is being driven by demand for ClearStar's technologically differentiated mobile solution, ClearID, which offers a streamlined test ordering process and allows integration with the customer's human capital management systems to maximise workflow efficiency. The Company also recently enhanced its MIS offering with the introduction, in Q2 2019, of new services for ordering breath alcohol screening to meet both Department of Transportation (DOT) and non-DOT requirements, including a combined drug and breath alcohol screening offer with consolidated test location and results reporting.

Robert Vale, CEO of ClearStar, said: "We are proud to have achieved this milestone of over \$1 million in monthly revenue for Medical Information Services. We are receiving ever-growing demand as customers increasingly recognise the value that our solutions can add to their screening programmes – to benefit both the employer and the employee. We are also pleased to introduce our new combined drug and breath alcohol testing service, which is the first step towards our goal of providing complete medical review services."

**Notice of Interim Results**

The Company gives notice that it will be announcing its interim results for the six months ended 30 June 2019 on Wednesday 18 September 2019.
